Professional Statement

Frontend Developer with experience building scalable web applications using React and TypeScript. Proven track record of delivering production ready features, improving code quality, and resolving production issues. Strong focus on performance, maintainability, and user experience.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Redux, Tailwind, Ant Design, Chakra UI, Chart.js, HTML, CSS
Testing: Jest, React Testing Library, Cypress
Cloud & Tools: Git, GitLab, Azure, GCP, Azure DevOps

Technical Work Experience

Frontend Developer, Loblaw Digital (Contract) [July 2025 – July 2026]

- Helped deliver consumer facing healthcare features using Next.js, TypeScript, and Chakra UI, including Medication Reminder and Vaccine History, supporting consistent experiences across web and mobile clients.
- Built and updated Contentful powered landing pages by enhancing CMS schemas, updating GraphQL queries, and developing reusable React components to support evolving design and requirements.
- Modernized critical legacy repositories by migrating npm to pnpm, upgrading Node.js and dependencies, increasing test coverage from 20% to 85%, introducing ESLint, SonarQube, and semantic-release, and coordinating documentation, releases, and post-deployment monitoring.
- Contributed to a federated micro frontend architecture in an Nx monorepo with Storybook and a shared design system, enabling feature teams to build and release independently while maintaining a stable shared shell.
- Built and maintained the team's shared Cursor skills and rules for generating and refactoring code, replacing ad hoc prompting with a repeatable AI workflow.

Frontend Developer, WhistleBlower Security Inc [May 2022 – January 2025]

- Developed scalable frontend features using React, Redux, and Tailwind CSS, ensuring responsive, accessible UI across devices for WhistleBlower Security's multi tenant SaaS platform.
- Designed and built user friendly React and Redux interfaces for a Content Management System (CMS), enabling clients to manage custom landing pages while streamlining workflows and reducing manual content updates.
- Integrated Vitally into the case management system, enhancing customer success workflows with real time data tracking, which improved response times and boosted customer satisfaction.
- Built an analytics dashboard using Chart.js, enabling users to visualize trends and perform drill down analysis.
- Provided on-call production support, troubleshooting, and resolving P2-level incidents on time.

Junior Full Stack Developer, PNI Media [March 2021 – April 2022]

- Worked as a Junior Full Stack Developer, using ASP.NET, JavaScript, React, MS SQL, and Azure to help deliver online printing solutions for Staples.
- Migrated legacy frontend from jQuery to React, improving scalability and accelerating future development.

Education

BSc. Software Systems – Computer Science
Simon Fraser University, Burnaby, British Columbia
